Hi

Please find our response below:

*Tameside Council is not currently using or planning to use technologies that rely on Automated Decision Making (ADM).*

*The Council will be using AI tools to improve the resident experience through automation of tasks, handle frequently asked questions and analyse data / trends to inform decision making. Any AI tools identified will be assessed on a case-by-case basis through the completion of a Data Privacy Impact Assessment (DPIA) and AI/Cyber assessments to ensure all risks are fully considered and managed appropriately.*

Kind regards,  
Richard
